# FCPX Full Access

**Plug In Install Guide**

1. Unzip your new file delivery from <u>FCPXFullAccess.com</u>

2. Open "**Finder**"

3. Go to the top bar and click "**Go**", after this click "**Home**".

4. Click on your user account then go to "**Movies**" > "**Motion Templates**"

5. If you do not have the folder "**Motion Templates**" then open Final Cut Pro X and it will create it for you.

   (If you already have "**Motion Templates**" folder with "**Titles**", "**Effects**", "**Transitions**", "**Compositions**" and "**Generators**" folders within, you can skip to **step 9**)

6. If you do not have any folders in your "**Motion Templates**" folder then you need to create individual folders with the following names: "**Titles**", "**Effects**", "**Transitions**", "**Compositions**" and "**Generators**". (Please make sure these are spelled correctly)

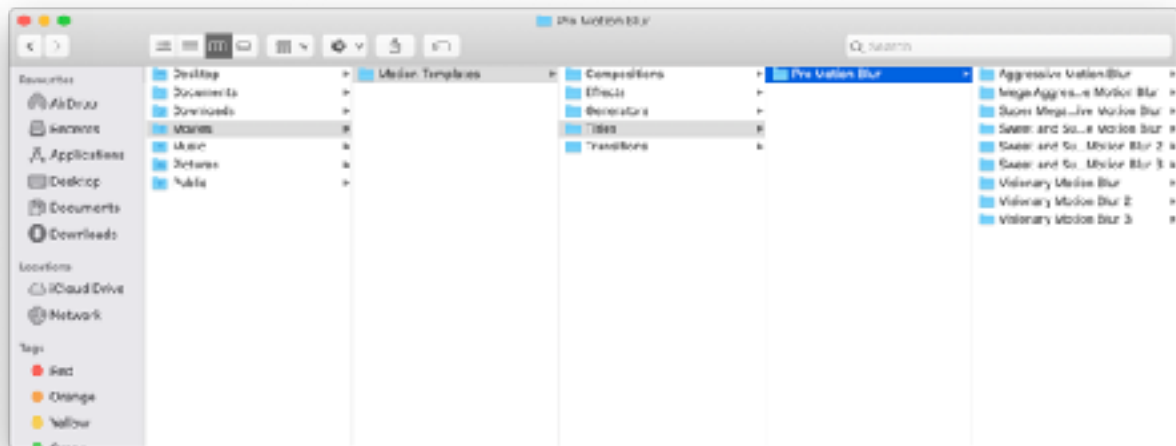

7. Next, right click on one of the folders and click "**Get Info**"

8. In the pop-up window, expand the "**Name & Extension**" tab and add ".**localized**" directly after the folder name, with no spaces.
   **Make sure this is spelled exactly as described above and in the screenshot below.**
   **Do this individually for each folder**.

9. Now drag your downloaded folder from FCPX Full Access into the appropriate folder (your download will come with instructions for which folder to drag into).

10. Open FCPX and enjoy your new plug in
